Job Description Title: Frontend Developer
Group Company: VCPL
Office Location: Chennai

About Company:
Vivriti Asset Management (part of Vivriti Group) is a fund manager to fixed–income funds that invest in enterprises, backed by fundamental research and sectoral view. The team brings to fore over a decade's experience in assessing and investing in Indian credit markets.
Vivriti Capital has created India's largest tech–enabled marketplace for enterprise debt, counting 400+ institutional participants, and having mobilized over US$ 3.5 Bn over the past 3 years.

About the team and role

Role of Frontend developer is designing and building applications on the React, Angular, JavaScript, HTML, CSS. They closely with design and product management teams to create elegant, usable, responsive, and interactive interfaces across multiple devices.

Primary responsibilities

- Collaborate with cross-functional teams, including designers, backend developers, and product managers, to create responsive and user-friendly web applications.
- Translate design mockups and wireframes into high-quality code using HTML, CSS, and JavaScript while ensuring compatibility across various browsers and devices.
- Optimize web applications for maximum speed and scalability, employing best practices in code optimization and performance tuning.
- Develop and maintain reusable code components and libraries for use in future projects.
- Perform and manage stages of the SLDC and participate in the systems review with Project Lead/Manager
- Demonstrate skills in problem-solving and decision-making.
- Experience with Test Driven Development
- Conduct thorough testing and debugging of web applications to identify and resolve issues promptly.

Required Skills

- Minimum of 3+ years of experience with frontend development
- Experience with frontend frameworks and libraries, such as React/Angular.
- Familiarity with version control systems (e.g., Git) and code collaboration tools.
- Collaborate with UI/UX designers to translate design mockups into responsive web interfaces.
- Integrate RESTful APIs and third-party services into web applications.
- Knowledge of responsive web design and mobile-first development principles.
- Strong problem-solving skills and attention to detail.
- Able to work independently and produce high-quality solutions.
- Excellent team player and strong interpersonal skills.
- Participating in code reviews
- Stay up-to-date with the latest front-end development trends and technologies.

Work Environment Details

- An opportunity to play a formative role in an ambitious financial services marketplace spanning investment banking, debt capital markets, institutional finance, retail lending and asset management
- A journey that will challenge and reward you in a manner few others will
